Portfolio wireframing

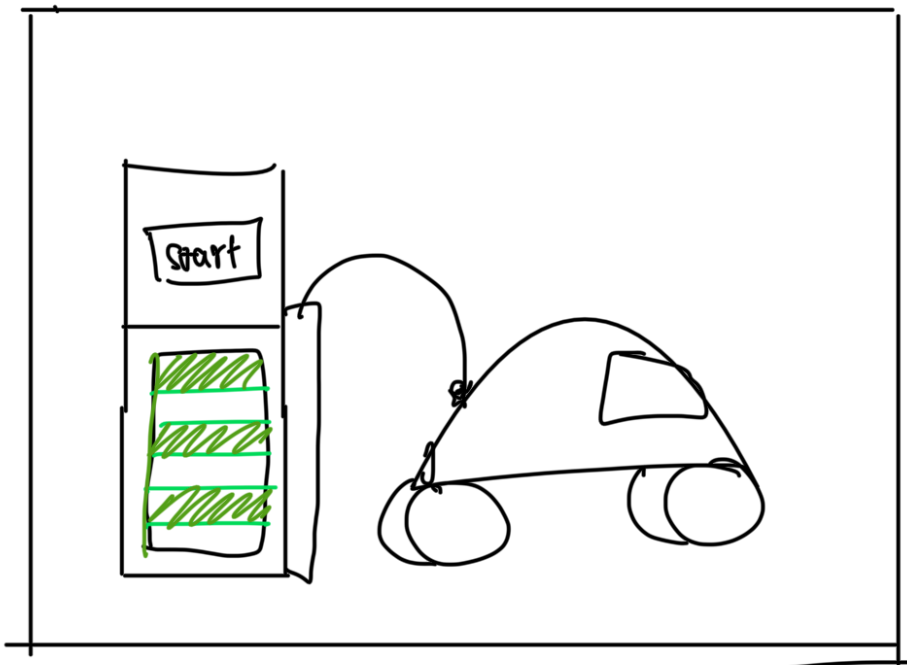
PC:

- Should reflect full-stack skills.
- UI/UX needs to be graphical
- Show EV related
- Show distributed, LLM knowledge.

I can make charger interface my main portfolio window.

Screen I

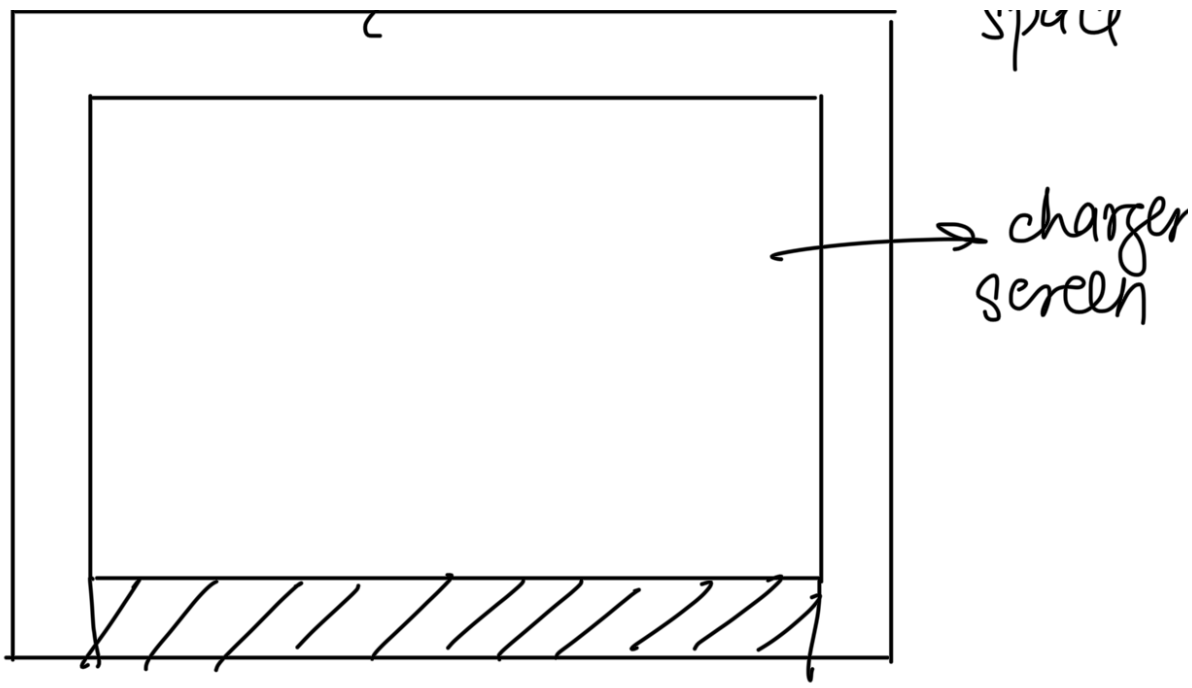
Battery charging animation



User clicks on the start screen button on the EV charger.

this is the background

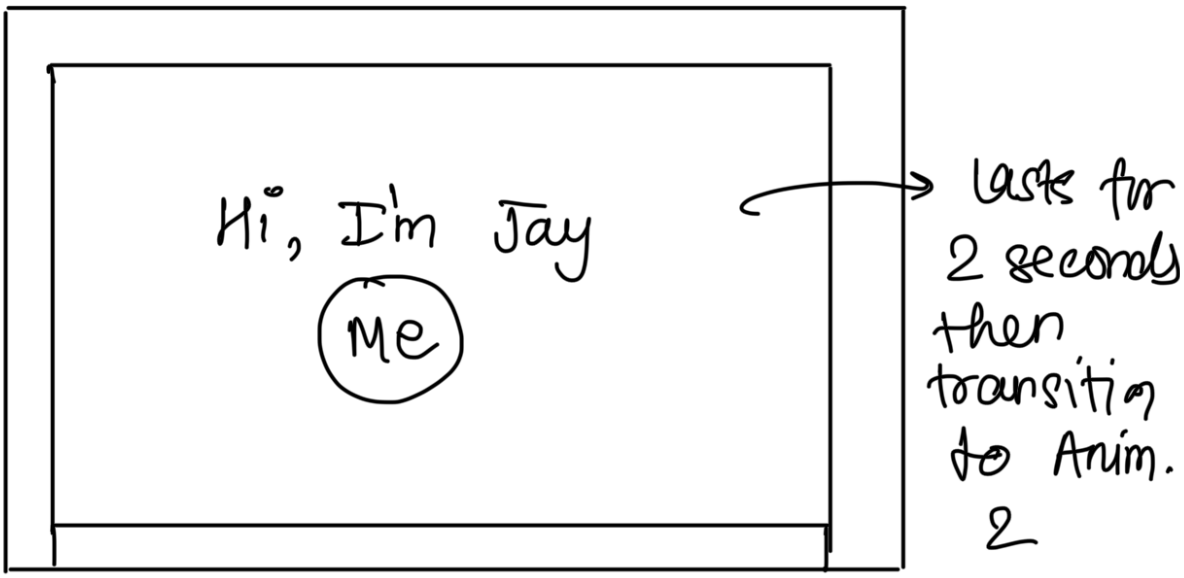
Screen II



On clicking **Start**, the screen will animate zoom in to the charger screen.

Screen II details : Post it note themed

Animation 1



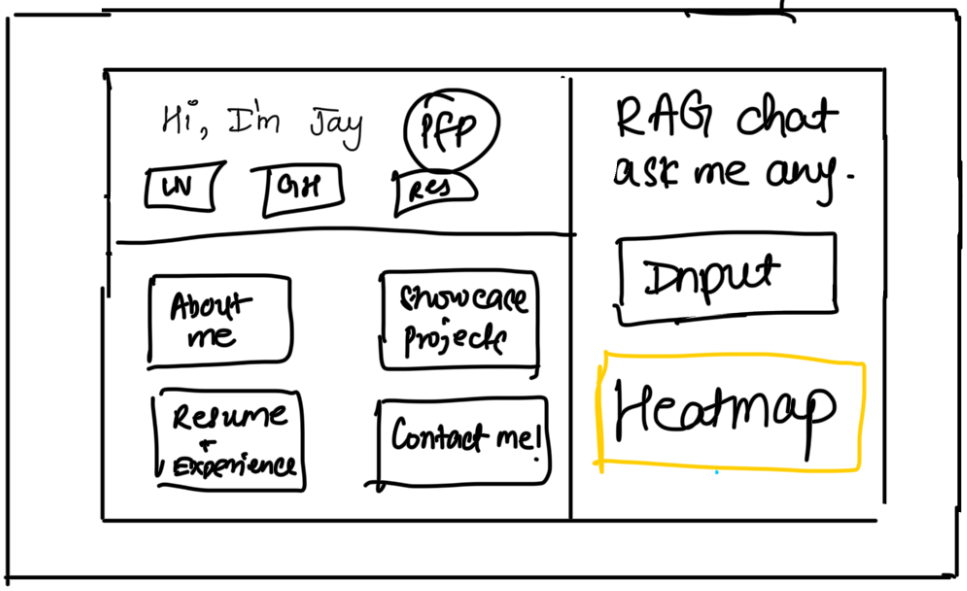
White & sky blue color palette

to match my profile pic.

White background.
Material theme.

Animation 2

this is the compute thing



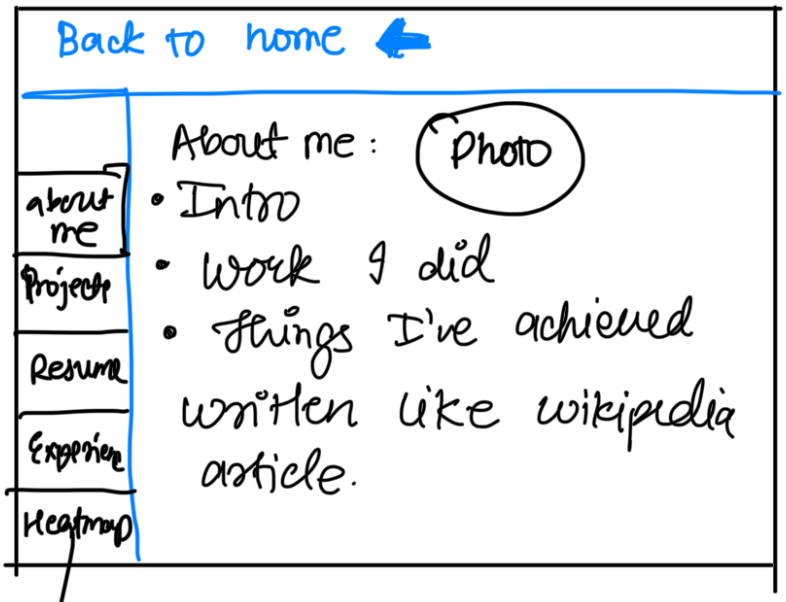
This part of 'Hi, I'm Jay' shrinks and to central left and RAG chatbot section appears moves the right side.

It will also spawn 4 cards below it, 2×2 layout grid in the left half of the screen.

Clicking any card will expand

it fully to the charged screen.

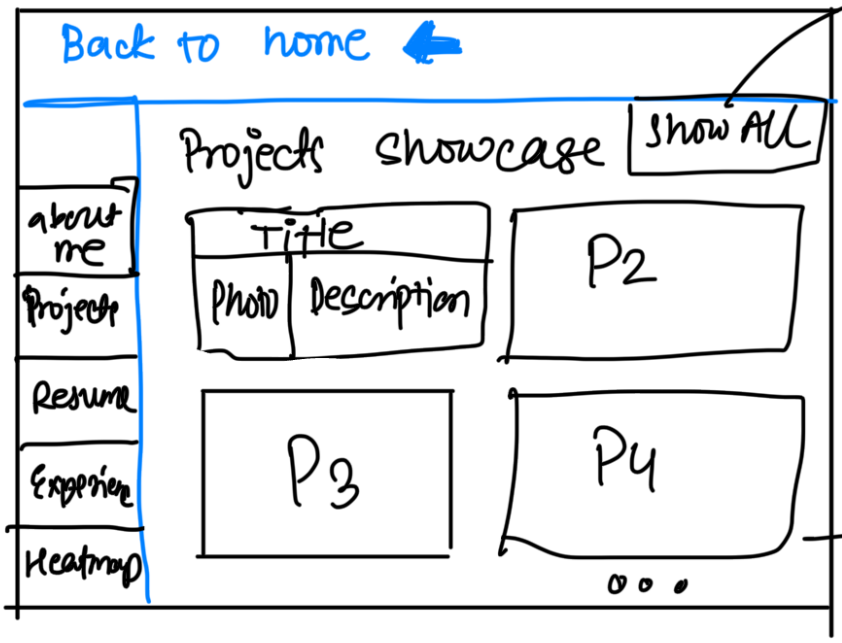
About me card expanded :



sidenav bar to quickly explore other sections

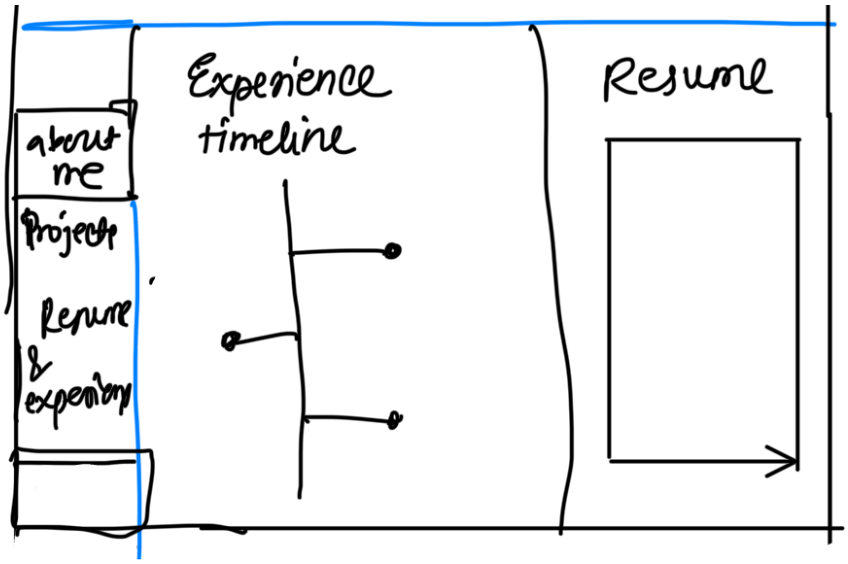
show all wi take to gith

featured u-
Projects screen card.



scrollable window

Experience + Resume screen card.



Contact me!

: has a form, where sender can put their email, & message.

: use existing architecture for this.
